

VISTA IRRIGATION DISTRICT

Errata Sheet for Minor Corrections to Vista Irrigation District 2020 Urban Water Management Plan (UWMP)

This errata sheet logs minor content errors that were identified after final adoption of the *Vista Irrigation District 2020 UWMP*. DWR has determined that these corrections are minor and do not require the UWMP to be amended.

These data errors have been corrected in the Department of Water Resources (DWR) UWMP database at <https://wuedata.water.ca.gov/secure/>

This errata sheet has been filed with the UWMP in all locations where it is made publicly available, including the California State Library. Errata may be submitted to State Library via email to cslgps@library.ca.gov

Name and agency of the person filing errata sheet: Alisa Nichols, Vista Irrigation District

#	Description of Correction	Location	Rationale	Date Error Corrected
1	Table 6-1 of the Submittal Tables was updated to include data from Table 6-5 of the Vista Irrigation District 2020 Urban Water Management Plan text (found on page 51) and to include the following in the notes: “The historical groundwater pumped identified in this table is stored in an open reservoir and blended with surface run-off. In order to avoid double reporting, the District does not separately report pumped groundwater in Submittal Table 6-8. This source is reported as surface water and included in the total reported surface water on Table 6-8.”	Submittal Table 6-1	Data updated to ensure consistent reporting methodology for groundwater and to include a more detailed footnote explaining that the District does not separately report pumped groundwater as it is reported as surface water and included in the total reported surface water in Table 6-8.	July 19, 2022
2	Sentence revised to the following for clarity: “The District is not coordinating with other local agencies for basin management or considering the formation of a GSA in the Warner Basin at this time. The District may choose to employ this groundwater management tool in the future.”	Page 50, Section 6.2.2 Groundwater Management, Last Sentence of Last Paragraph	Clarification to ensure compliance with California Water Code Section 10631 (b)(4)(B).	July 19, 2022

VISTA IRRIGATION DISTRICT

Submittal Table 6-1 Retail: Groundwater Volume Pumped						
<input type="checkbox"/>	Supplier does not pump groundwater. The supplier will not complete the table below.					
<input type="checkbox"/>	All or part of the groundwater described below is desalinated.					
Groundwater Type <i>Drop Down List</i> <i>May use each category multiple times</i>	Location or Basin Name	2016*	2017*	2018*	2019*	2020*
<i>Add additional rows as needed</i>						
Alluvial Basin	Warner Basin	7,177	3,993	2,640	3,843	751
TOTAL		7,177	3,993	2,640	3,843	751
* Units of measure (AF, CCF, MG) must remain consistent throughout the UWMP as reported in Table 2-3.						
NOTES: The historical groundwater pumped identified in this table is stored in an open reservoir and blended with surface run-off. In order to avoid double reporting, the District does not separately report pumped groundwater in Submittal Table 6-8. This source is reported as surface water and included in the total reported surface water on Table 6-8. Approximately 1/3 of water held in the lake evaporates; of the portion that is delivered 40% is for VID use, 40% for City of Escondido, and 20% for the Rincon Band under the terms of the Settlement Agreement.
